

Project 2 - Dirt Bikes Website

Author: Tyler Andrews

Overview:

This project delivers a responsive website for Dirt Bikes USA showcasing products, company background, and news.

Site Structure:

- index.html: Home with featured products and tagline.
- products.html: Product list (Enduro 250, Enduro 550, Moto 300, Moto 450).
- moto300.html: Moto 300 details and Bill of Materials for the Moto 300 Brake System.
- about.html: Company history and financial snapshot.
- blog.html: Sample posts and news section.
- contact.html: Contact info and demo contact form.

Design choices:

- Bootstrap CDN for quick responsive layout and consistent components.
- Neutral, simple color scheme to keep focus on products and content.
- Placeholder images used for product photos (replaceable later).

Challenges:

- No backend for form submission (assignment requested front-end only).
- Placeholder images used; real product images will improve realism.

Files included:

- All HTML files, assets (placeholder images), and this PDF report.

Bill of Materials (Moto 300 Brake System) subtotal included on Moto 300 page.
